Improving Integration between 1ShoppingCart.com and PayPal

If you're a 1ShoppingCart user and accept PayPal as a payment method than there's a neat little trick you should be aware of that will enable 1ShoppingCart and PayPal to work better together. It's called a "PDT Identity Token" and we highly encourage you to follow the steps below to improve the interaction between these two systems.

Please note: You need a Business or Premier Account with PayPal, not a personal account for this to work.

Step #1	Log into yo	ur 1ShoppingCart.com	n account
---------	-------------	----------------------	-----------

Step #3 Scroll down to the box that reads "PayPal PDT (Payment Data Transfer)"

Step #4 Click on the link that says "click here" within that grey box

Step #5 A new window will open up with the heading "Using Payment Data Transfer (PDT) For PayPal Standard Transactions". See next page. Go to Section III, which is titled "I have a Premier or Business Account with PayPal." In step 4 of those instructions you'll see the URL <u>http://www.mcssl.com/app/postauthorizeb1pp.asp</u>. Highlight and copy this URL.

The page you go to will be titled "Website Payment Preferences" and is pictured on the next page. Complete the following five steps on this page.

- Step #9 Set "Auto Return for Website Payments" to "On".
- Step #10 Paste that URL you highlighted and copied in Step #5 into the box in PayPal that says "Return URL".
- Step #11 Set "Payment Data Transfer" to "On".
- Step #12 Highlight and copy the alphanumeric "Identity Token" listed underneath this.
- **Step #13** Scroll down to the bottom of the page and click on the "Save" button.

Payment Data Transfer allows you to receive notification of successful payments as they are made. The use of Payment Data Transfer depends on your <u>system configuration</u> and your Return URL. Please note that in order to use Payment Data Transfer, you **must** turn on Auto Return.

Payment Data ⓒ On Transfer: ○ Off

Identity Token: sOeP-ekt5du34-o7WI-GBv6OFPD1im5pBii0ksFdJuJdfutGK0TgymjiBKy

Encrypted Website Payments

Using encryption enhances the security of website payments by decreasing the possibility that a 3rd party could manipulate the data in your button code. If you plan on only using encrypted buttons you can block payments from non-encrypted ones.

Learn more about Encrypted Website Payments

Note: If you enable Encrypted Website Payments, all of your Buy Now, Donations, and Subscriptions buttons **must** be encrypted via one of the following methods:

- Using the Button Factory with the security settings enabled.
- Using your own code, you encrypt all website payments before sending them to PayPal.

By enabling this feature, any Buy Now, Donation, or Subscription button that is not encrypted will be rejected by PayPal.

Block Non-encrypted O On Website Payment: © Off

PayPal Account Optional

When this feature is turned on, your customers will go through an optimized checkout experience. This feature is available for Buy Now, Donations, and Shopping Cart buttons, but not for Subscription buttons. Learn More

Step #14 Return to your open 1ShoppingCart.com window and place a check in the little box titled "Enable PDT" that is just to the right of the PayPal PDT box.

Step #15 Paste the Identity Token into the box labeled "PDT Identity Token".

Step #16 Click the "Save Changes" button.

This may seem like quite a few steps but you can do it in just a few minutes and shopping cart experts like Christina Hills of <u>www.ShoppingCartQueen.com</u> report that it has significantly improved their PayPal/1ShoppingCart interaction.
